

University Health Services
Davison Health Center

Date: April 2, 2009
To: All incoming Graduate Students
From: Davis Smith MD, Medical Director
Re: Vaccination Compliance and Tuberculosis Screening

Welcome to Wesleyan. To fully qualify for enrollment, all incoming students must meet certain health standards set by the State of Connecticut and the university. These include compliance with vaccination against Measles and Rubella, Tuberculosis blood testing and possible testing for Hepatitis B.

To simplify and facilitate the process of compliance, Wesleyan's Davison Health Center has organized a special clinic during which incoming graduate students can schedule a 20-minute visit with a Health Center Nurse.

Please call 860-685-2470 or email mschukoske@wesleyan.edu to schedule an appointment.

TB/Vaccination Clinic Date
Wednesday, September 2 (9a.m. – 12 noon)

Please refer to the table below for the procedures and costs.

Procedure	Cost
Tuberculosis blood test	*Lab cost if testing required
Hepatitis blood test	*Lab cost if testing required
Measles and Mumps vaccine confirmation	*Lab cost if titers required
	*Billable to Insurance

Thank you for your cooperation with this procedure. **If you fail to comply with the required screening, a hold will be placed on your enrollment (and purchase of books).** Please note - It takes about twenty-four hours for a hold to clear.
