

What to Do Before Your Wellness and Sexual Health Visit

- Review and complete the enclosed personal history form (Pre-Visit Survey). This will allow us to focus the visit on relevant evaluation and education. Remember to bring the form with you when you come for your visit.
- Don't Urinate.** It is not possible to accurately test for Gonorrhea and Chlamydia within two hours of the urethra's being flushed with urine.
- Review the document *About the Wellness and Sexual Health Visit*. Spend some time thinking about what testing you feel you need.

The fees for tests will be charged to your student account as "miscellaneous lab fees". If you prefer to pay by an alternate method (cash or check at the time of the appointment), please notify the provider during your visit.

Your appointment is scheduled for _____
at _____.
