How to Connect to the wesguest (iPad)

Go to your Settings on your iPad. Look for Wi-Fi at the left and select Other... even if wesguest is present.

Following the prompts, enter wesguest, select Security to be WEP and enter the password w1831.

Wait for the Wi-Fi icon to appear next to iPad at the top left.
Open Safari from your Home Screen and you will be directed to a Cisco page. Enter your Wesleyan credentials as you normally would. You should now be connected to the Internet.
