How to Connect to wesguest (Win7/Vista)

Right-Click on the **Network and Sharing Center** icon on the bottom right of the top bar. Click on **Other Network** even if **wesguest** is present in your list of possible networks to connect to.

![Network and Sharing Center](image)

Enter the name **wesguest** at this next prompt:

![Connect to a Network](image)

Another prompt will appear asking for the network password. Windows 7 should recognize that the network requires authentication **WEP**.
Type in **w1831**

A familiar Cisco NAC Agent will appear. Enter your Wesleyan Username and Password.

You should automatically be connected to the network:
Open Safari or any other web browser you prefer and you should be good to go for internet access!
