Preliminary Inventory
Leroy Albert Howland Papers
Collection Number: 1000-264

Date: 1911-1947

Number of containers: 1 slim Hollinger box

Brief description of collection:

The Leroy Howland Papers contain a sample of the academic and pedagogical work of Wesleyan Mathematics Professor Leroy Albert Howland. The collection consists of drafts of numerous mathematics papers and associated correspondence, as well as lecture plans and various unpublished manuscripts concerning the history of mathematics and great mathematicians.

Folders:
1. Six mathematics papers and correspondence regarding publication, 1911-1915
2. Two Lectures for math-astronomy (and lecture outline), 1912 & 1918
3. Draft of projected biography of mathematician "La Place", 1928-1940s
4. Ms. notes on The Academy of Science
5. Manuscript on history of French mathematics and role played by La Place
6. Draft manuscript (part typed, part handwritten) on Gluck, Haydn, Mozart, Beethoven, and Shubert
7. Draft manuscript of a paper on the metric system 1946-47
8. Manuscript of math textbook (?)
