Why I chose Wesleyan:

At Wes there are so many opportunities and resources that I was excited to pursue. I found Wes to be a place with a pleasant combination of what I was looking for in a school. There is the open curriculum allowing me to pursue my multiple academic interests and encouraged interaction between students and their peers and professors. I also found the lively atmosphere and many more qualities of the institution captivating.

Academic Interests:

While I intend to double major in Molecular Biology and Biochemistry and French, my other academic interests include social entrepreneurship, neuroscience, and computer science.

Favorite class at Wes:

Surprisingly, Accelerated Intermediate French II. I enjoyed seeing my language skills increase every week. I found myself so excited every time I realized I could comprehend what was being said in a French video or film! I also appreciated that the group of students in my French class were quite lively.

Current Classes:

Principles of Biology II
Principles of Biology II – Lab
French Composition and Conversation
Principles of Chemistry II
Hatha Yoga

Why I want to be a tour guide:

I am truly glad that I chose to attend Wes. My goal is to convey the many great and unique qualities Wes has because it's worth sharing. When I took a tour, I left it feeling excited by the prospect of seeing myself here. After hearing about and observing the many useful and successful programs there are and how distinctive the school is, I find Wes a great school to recommend. I already tell all my family friends who are thinking of college about Wes. Now I can share it with even more prospective students.
