

SAMPLE SCHEDULE 2

This is a sample schedule showing the possible positioning of science pre-requisite courses in a four-year plan for a student that is considering applying to medical school after their THIRD year of college. This schedule would prepare the student for the MCAT for a late spring test date in the third year.

We encourage students to incorporate coursework that will prepare them for the 'Psychological, Social, and Biological Foundations of Behavior' section of the MCAT. This could entail courses in Psychology, Sociology, Science in Society, and possibly Anthropology. Take a look at the Health Studies Cluster to gain an idea of a number of health related courses offered on campus. Additionally, students will need to complete a year of ENGL for most health professional programs. Medical Schools classify acceptable ENGL courses as those that encompass Composition and Rhetoric, Creative Writing and Literature.

	FALL	SPRING
First Year	BIOL 181 or MB&B 181 BIOL 191 CHEM 141 or CHEM 143	BIOL182 or MB&B 182 BIOL 192 CHEM 142 or CHEM 144 CHEM 152
Second Year	CHEM 251 CHEM 257	CHEM 252 CHEM 258 MATH 132 (STATS)
Third Year	PHYS 111 PHYS 121	MB&B 228 (Biochem) PHYS 112 PHYS 122
Fourth Year	MATH 119 or 121
