

Bring a Raptor to your School!

These Connecticut organizations offer live raptor programs to nature centers, libraries and schools. They are wildlife rehabilitation centers whose aim is to heal injured, orphaned, or ill birds and return them to the wild. When birds cannot be returned to the wild because of injury or disability, they may become “ambassadors” to the public. These birds and their expert handlers offer audiences of all ages the opportunity to learn about raptors and how they interact with human habitat.

These facilities offer a standard, hour-long educational program with four birds, which may include Red-tailed Hawk, Barn Owl, Great Horned Owl, American Kestrel, Eastern Screech Owl, Northern Saw-Whet Owl, Turkey Vulture, Common Raven, Peregrine Falcon, and others. Programs may be tailored; please call to discuss details.
