- **PLASTIC BAGS**. They jam up the recycling machinery! (*Instead, recycle at a grocery store*)
- NON-RECYLABLE PLASTIC like bottle caps, plastic wrap, toys and Styrofoam peanuts.
- LIQUIDS empty liquids from all recyclable containers.
- **CERAMICS OR GLASS** that isn't a bottle or jar (no mirrors, light bulbs, broken glass).
- DIAPERS and other sanitary materials.
- HAZARDOUS WASTE like paint, oil, and batteries (bring to a special hazardous recycle day).
- **SCRAP METAL** like pots, pans and hangers.
- PIZZA AND PASTRY BOXES because they are contaminated with grease and food scraps.
- DIRTY PAPER like paper towels, napkins, tissues, or paper used for pets.
- YARD WASTE like leaves and dirt (instead, try composting them).
- **ELECTRONICS** like headphones or cell phones (*instead, bring to the recycle center*).
- ITEMS IN PLASTIC BAGS. Bags are #1 on this list, so don't tie anything up in them!

Please DO recycle these items (and here's how):

In a blue recycle bin:

- #1 to #7 plastic containers (rinse and remove caps)
- Juice boxes and milk or juice containers (remove caps and straws)
- Glass food and drink jars and bottles (rinse and remove caps)
- Metal food cans (rinse) and aluminum soda cans
- Aluminum foil and pie plates (clean)
 In a separate blue bin or paper bag:
- All paper (no books)
 - **Bundled and tied:**
- Corrugated cardboard

These guidelines are for the Middletown, CT Sanitation District, which is not yet set up for single-stream collection (even though materials are recycled single-stream). Every town recycles differently; call your city hall to find out what and now to recycle in your town.
