

RECYCLE THIS!

THINK DEEPER: QUESTIONS TO PONDER

- How does nature re-use and recycle? Can you think of some examples?
- How can humans reduce, reuse and recycle to create less garbage? What are some ways that kids can help?

CHALLENGE

- It can be hard to remember to recycle, even when you want to! Can you create a poster for your home or school to help everyone remember? For an extra challenge, use recycled materials to make it!
- Write a thank-you letter to someone in your community who is helping with recycling. This could be a custodian at your school, the recycle truck driver in your town, or your town recycling coordinator or public works department. (Middletown addresses can be found in the Educators folder).

If you answer an Earth Out Loud challenge and would like to share your response, email us at earthoutloud@wesleyan.edu.
