## KEY CODE

**Fund code:** This is the code used on Fidelity's automated phone lines to request transactions for the investment option. You will not need this code if you use the Internet to make transactions.

**Ticker:** This is also called the "trading" symbol for the fund. If the fund is listed and traded on any of the major exchanges, this is the code that is used to identify the fund.

### American Funds 2010 Target Date Retirement Fund® Class R-6

**Fund code:** OK0S

**Objective:** The investment seeks growth, income and conservation of capital.

**Strategy:** The adviser will attempt to achieve the fund's investment objectives by investing in a mix of American Funds in different combinations and weightings. The underlying American Funds represent a variety of fund categories such as growth-and-income funds, equity-income funds and a balanced fund and bond funds. Equity-income and balanced funds generally strive for income and growth through stocks and/or bond investments, while bond funds seek current income through bond investments.

**Risk:** The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market; Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 07/13/2009. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 02/01/2007, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

#### **Vanguard Extended Market Index Fund Institutional Shares**

**Fund code:** OSID

**Ticker:** VIEIX

**Objective:** The investment seeks to track a benchmark index that measures the investment return of small- and mid-capitalization stocks.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of S&P Completion Index, a broadly diversified index of stocks of small and mid-size U.S. companies. It invests by sampling the index, meaning that it holds a broadly diversified collection of securities that, in the aggregate, approximates the full index in terms of key characteristics. These characteristics include industry weightings and market capitalization, as well as certain financial measures, such as price/earnings ratio and dividend yield.

**Risk:** Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

The S&P Completion Index contains all of the U.S. common stocks regularly traded on the New York and American Stock Exchanges and the Nasdaq over-the-counter market, except those stocks included in the S&P 500 Index.

#### **Vanguard Total International Stock Index Fund Institutional Shares**

**Fund code:** OERM

**Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the FTSE Global All Cap ex US Index, a float-adjusted market-capitalization-weighted index designed to measure equity market performance of companies located in developed and emerging markets, excluding the United States. The index includes approximately 5,800 stocks of companies located in over 45 countries.

**Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Fund code:** OFNY

**Objective:** The investment seeks long-term capital growth and income through an actively managed portfolio of stocks, bonds and money market instruments.

**Strategy:** The fund will invest in a diversified portfolio of stocks, bonds and money market instruments, with at least 20% of the fund's assets invested in each of the following categories: (i) domestic and foreign equity securities, such as common stock and (ii) fixed-income securities, such as U.S. government and agency securities, corporate bonds, money market funds, and cash.

**Risk:** Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking to invest in a fund that invests in both stocks and bonds; Someone who is seeking the potential both for income and for long-term share-price appreciation and who is willing to accept the volatility of the bond and stock markets.

#### **Western Asset Core Plus Bond Fund Class IS**

**Fund code:** OUTE

**Objective:** The investment seeks to maximize total return, consistent with prudent investment management and liquidity needs.

**Strategy:** The fund invests in a portfolio of fixed income securities of various maturities and, under normal market conditions, will invest at least 80% of its net assets in debt and fixed income securities. Although the fund may invest in securities of any maturity, it will normally maintain a dollar-weighted average effective duration within 30% of the average duration of the domestic bond market as a whole as estimated by the fund's subadvisers. The fund may invest up to 20% of its total assets in non-U.S. dollar denominated securities.

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking potential returns primarily in the form of interest dividends rather than through an increase in share price; Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

Duration estimates how much a bond fund's price will change with a change in comparable interest rates. If rates rise 1%, for example, a fund with a 5-year duration is likely to lose about 5% of its value. Other factors also can influence a bond fund's performance and share price. Accordingly, a bond fund's actual performance may differ from this example.

The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 08/04/2008. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 07/08/1998, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

#### **Vanguard Federal Money Market Fund Investor Shares**

**Fund code:** OQQL

**Objective:** The investment seeks to provide current income while maintaining liquidity and a stable share price of \$1.

**Strategy:** The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. It maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less. The fund generally invests 100% of its assets in government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

**Risk:** *You could lose money by investing in a money market fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to money market funds and you should not expect that the sponsor will provide financial support to the fund at any time.* Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who has a low tolerance for investment risk and who wishes to keep the value of his or her investment relatively stable; Someone who is seeking to complement his or her bond and stock fund holdings in order to reach a particular asset allocation.

#### **Vanguard Institutional Index Fund Institutional Shares**

**Fund code:** OFVH

**Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of large-capitalization stocks.

**Strategy:** The fund employs an indexing investment approach designed to track the performance of the Standard & Poor's 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

**Risk:** Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

**Short-term redemption fee:** None

**Who may want to invest:** Someone who is seeking the potential for long-term share-price appreciation and, secondarily, dividend income; Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

#### **Vanguard Total Bond Market Index Fund Admiral Shares**

**Fund code:** OQAZ

**Objective:** The investment seeks the performance of Bloomberg Barclays U.S. Aggregate Float Adjusted Index.

**Strategy:** Bloomberg Barclays U.S. Aggregate Float Adjusted Index represents a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year. All of its investments will be selected through the sampling process, and at least 80% of its assets will be invested in bonds held in the index.

**Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties.
