How to Connect to wesguest (Mac):

Click on the Airport or Wi-Fi icon on the top right of the top bar. Click on Open Network Preferences… even if wesguest is present in your list of possible networks to connect to.

Make sure Airport or Wi-Fi is highlighted on the left-hand side and then on the drop down on the right select Join Other Network…
Another dropdown menu will appear. Enter the information as it is written here:

Enter **wesguest** for network name, select WEP for **Security**, and **w1831** for the password. Hit **Join**. You should automatically be connected to the network:
Open Safari or any other web browser you prefer. Cisco will pop up the same way as it had with AirWes.

Enter your Wesleyan credentials like before and you should be good to go for Internet access!
