What is Betterbin?
Betterbin is a website/mobile app that provides recycling info specific to Wesleyan, simplifying the process for students.

How does it work?
The user is able to use the app either on their personal device, or on an iPad which will be placed in a common area in school. Then, the user is simply able to search the name of the item, and Betterbin’s database will let you know where it goes.

What is our goal with Betterbin?
Our goal is to increase recycling knowledge accessibility as well as reducing the amount of contamination on campus. With the information available for all students in the form of an app, it enables the recycling process to be much simpler.
