

1. Remediate all unsupported operating systems – June 2023
Identify all unsupported operating systems running at Wesleyan. Each system will be upgraded to a supported version, shutdown, or protected via compensating controls.
2. Revamp Personally Identifiable Information (PII) scanning – June 2023
Update all software used in PII scanning processes. Confirm PII scanning software is installed and running on appropriate workstations.
3. Build out new IAM process – June 2023
Work to migrate existing IAM processes from current systems to new IAM platform.
